List of Tables

1	Plateau voltage	9
2	Background Radiation	9
3	Poisson distribution for 100 readings: counts per second m , actual occurrence of m , predicted occurrence of m	10
4	Dead time count measurements for source A, source B, and source A and B together	10
5	Time for the counter to register 1000 particles through 1 to 7 graphite slabs of thickness $7.5\text{mm} \pm 0.05\text{mm}$, the natural log of the number of counts minus the expected count due to background radiation, and the error on each data point	11

List of Figures

no table of contents for a paper
as short as a lab report²
