#### Abstract

The Elements of Theses as a Demonstration of ucscthesis.cls for Second Edition ATEX by

\section*{Perry H. Disdainful}

Theses have elements. Isn't that nice? All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy. All work and no play makes Johnny a dull boy.

## Contents

List of Figures ..... v
List of Tables ..... vi
Dedication ..... vii
Acknowledgements ..... viii
1 Introduction ..... 1
1.1 This demonstrates a section ..... 1
1.1.1 Subsection 1 ..... 2
2 Previous Work ..... 4
3 Conclusion ..... 6
A Some Ancillary Stuff ..... 7
Bibliography ..... 8

## List of Figures

1.1 Transverse Scans at difference Temperatures at $H=11 \mathrm{~T}$ ..... 2
2.1 A first figure. ..... 4
2.2 A second figure. ..... 5

## List of Tables

1.1 A normalsize table. There has been a complaint that table captions are not singlespaced. This is odd because the code indicates that they should be.3
1.2 A small table. ..... 3

To myself,

Perry H. Disdainful, the only person worthy of my company.

## Acknowledgements

I want to "thank" my committee, without whose ridiculous demands, I would have graduated so, so, very much faster.

## 1 Introduction

Every thesis should have an introduction. You might not realize it, but the introduction should introduce the concepts, backgrouand, and goals of the thesis. Every thesis should have an introduction. You might not realize Every thesis should have an introduction. You might not realize Every thesis should have an introduction. ### 1.1 This demonstrates a section

Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section.

Here's some text for the section. Here's some text for the section. Here's some Fig. 1.1 text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text for the section. Here's some text $\nu^{2 \beta}$ for the section. Here's some text for the section. Here's some text for the section.

Figure 1.1: Representative transverse scans for the different temperatures below $T_{\mathrm{c}}(H)=63.7 \mathrm{~K}$ taken with $H=11 \mathrm{~T}$ after cooling in $H=0$. Each scan is displaced vertically by 0.1 units from the scan below it for clarity. The solid curves are results of least-squares fits to a Gaussian line shapes with a half-width-at-half-maximum equal to $2.1 \times 10^{-4}$ r.l.u.

### 1.1.1 Subsection 1

Here's a citation of one of the references [1]. Here's some text to fill up the sub-section. Here's some text to fill up the sub-section. Here's some text to fill up the sub-section. We can do equations like this first famous attempt at special relativity $E=m a^{2}$. A second attempt was $E=m b^{2}$. Finally, the correct answer was found to be

$$
\begin{equation*}
E=m c^{2} \tag{1.1}
\end{equation*}
$$

However, a pathetic attempt was made to push for

$$
\begin{equation*}
E=m c_{2} \tag{1.2}
\end{equation*}
$$

but that was quickly rejected with much ridicule. Here's some text to fill up the sub-section. Here's some text to fill up the sub-section. Here's some text to fill up the sub-section. Here's some text to

## Appendix A

## Some Ancillary Stuff

Ancillary material should be put in appendices. The guidelines are not clear whether bibliography comes before or after the appendices, but they suggest appendices come first.
